PROFESSIONAL SUMMARY

B.Tech Graduate (2026) in Computer Science & Engineering (Artificial Intelligence and Machine Learning) with hands-on experience across Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, and full-stack web development (Django, Flask, FastAPI). Built 6 end-to-end projects and completed a Data Science & ML internship along with 8 Coursera certifications in Python, AI, computer vision, big data, and blockchain. Seeking opportunities as an AI Engineer, Machine Learning Engineer, Data Analyst, Data Scientist, Python/Django Developer, Software Engineer, Generative AI Engineer, or NLP Engineer.

SKILLS

Programming Languages: Python, SQL, JavaScript, C, HTML, CSS

AI / ML: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, Prompt Engineering, Transfer Learning, CNNs, RAG (Learning), LangChain (Learning)

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, OpenCV, Django, Flask, FastAPI, Pandas, NumPy, Seaborn, Matplotlib, MediaPipe, YOLOv8, Dlib, PIL

AI Tools & APIs: OpenAI API, Gemini API, Hugging Face, REST APIs, JWT Authentication, Google OAuth

Databases: MySQL, SQLite, MongoDB, SQLAlchemy

Tools & Platforms: Git, GitHub, VS Code, PyCharm, Jupyter Notebook, Google Colab, Docker (Learning), Postman

EDUCATION

P. P. Savani University

2022 – 2026

Bachelor of Technology, Computer Science & Engineering (Artificial Intelligence and Machine Learning) — CGPA: 7.40 / 10

EXPERIENCE

Data Science & Machine Learning Intern — YBI Foundation

June 2024

- Completed end-to-end ML workflows including data cleaning, feature engineering, model training, and evaluation using Pandas, NumPy, and Scikit-learn.
- Worked on supervised learning tasks and produced performance reports comparing model accuracy across multiple classifiers.
- Gained practical exposure to real-world datasets and industry-standard ML pipelines.

PROJECTS

AI-Generated vs Human-Written Text Detection

Technologies: Python, NLP, Scikit-learn, Hugging Face Transformers, RoBERTa, SBERT, XGBoost, Streamlit, Pandas, NumPy

- Designed an end-to-end NLP pipeline to classify AI-generated vs. human-written text using Machine Learning and Transformer-based Deep Learning models.
- Engineered hybrid features combining TF-IDF, stylometric analysis, POS tagging, and SBERT embeddings to capture statistical, syntactic, and contextual writing patterns.
- Trained and optimized Logistic Regression, XGBoost, and RoBERTa models on ~50,000 text samples, achieving 89–90% accuracy via ensemble learning.
- Deployed as an interactive Streamlit application enabling real-time prediction with confidence scoring.

Derma Skin AI — Skin Disease Classification & Treatment Recommendation

Technologies: Python, FastAPI, TensorFlow, EfficientNet-B1, OpenCV, SQLite, HTML/CSS, Jinja2

- Developed an AI-powered system to identify 10 dermatological conditions from medical images using Deep Learning and Computer Vision.
- Trained and evaluated an EfficientNet-B1 model on 8,400+ dermatology images, implementing preprocessing, augmentation, and performance optimization.
- Built a FastAPI web application with patient registration, authentication, medical history management, and automated report generation.

- Integrated automated disease prediction with confidence scoring and treatment recommendation modules; implemented SQLite for secure patient record storage.

Campus Placement Portal with Automated Resume Matching

Technologies: Python, Django, SQLite, JWT Authentication, Google OAuth, HTML/CSS, JavaScript

- Built a Django-based web portal to streamline campus recruitment with role-based access for students, recruiters, and admins.
- Implemented automated resume matching using NLP-based similarity checks to recommend suitable candidates to recruiters.
- Designed modules for job postings, applications, recruiter dashboards, and automated candidate shortlisting.

OfflineExamGuard — Exam Cheating Detection System

Technologies: Python, Flask, OpenCV, MediaPipe, YOLOv8, Dlib, TensorFlow, SQLite

- Developed an AI-powered offline exam surveillance system to detect suspicious behaviors such as face orientation changes, hand gestures, and mobile phone usage.
- Built real-time video pipelines using MediaPipe, YOLOv8, and Dlib for face verification, gaze tracking, and anomaly detection.
- Designed a Flask-based web interface for live monitoring, session management, real-time alerts, and offline reporting.

ROBI — Smart Companion AI Chatbot

Technologies: Python, Flask, REST APIs, SQLite, JSON, Tkinter, Requests

- Developed an intelligent chatbot with natural language understanding and real-time response generation using Flask.
- Integrated third-party AI services via REST APIs with dynamic data handling using JSON and Python Requests.
- Implemented SQLite for query logging and personalized responses, with scalability for future ML-based predictive dialogue and analytics.

Trekking Club App

Technologies: Python, Flask, SQLAlchemy, OpenCV, Fast2SMS API, HTML/CSS, JavaScript

- Built a trekking application with GPS tracking, user management, first aid guidance, and emergency SOS alerts via Fast2SMS API.
- Integrated interactive maps and image-based health/plant disease detection using OpenCV, with Ayurvedic remedy suggestions.
- Designed a wearable emergency belt with an adjustable alert button to enhance real-time safety in remote environments.

CERTIFICATIONS

- Data Science and Machine Learning Internship — YBI Foundation (2024)
- Introduction to Generative AI — Google Cloud, Coursera (2025)
- Introduction to Computer Vision and Image Processing — IBM, Coursera (2024)
- Blockchain Specialization (4 courses) — University at Buffalo, Coursera (2026)
- Big Data Emerging Technologies — Yonsei University, Coursera (2025)
- Capstone: Retrieving, Processing, and Visualizing Data with Python — University of Michigan, Coursera (2023)
- Python Data Structures — University of Michigan, Coursera (2023)
- Programming for Everybody (Getting Started with Python) — University of Michigan, Coursera (2023)
- The Bits and Bytes of Computer Networking — Google, Coursera (2023)

ACHIEVEMENTS

- Recognized for stellar service and leadership as Student Coordinator for “Artifax AI,” organized during Engineer’s Day Celebration at P. P. Savani University (September 2025).
